

Choose Gliffy for Advanced Diagramming Out of the Box

Do you have customers looking for a way to visualize complex systems and processes directly in Confluence?

Between Gliffy and draw.io, the two most popular diagramming options on the Atlassian Marketplace, Gliffy offers a more enterprise-ready solution your team can rely on. Here's why:

AI Diagramming You Can Trust

AI can save your team hours and help you go to market faster, but security still needs to come first.

At Gliffy, we took the time to incorporate AI into your diagramming experience the right way so you can introduce it to your workflows with confidence.

Unlike draw.io's Sparkle tool, our Create with AI feature is ISO 42001 certified, demonstrating an ethical, transparent, and compliant use of AI.

User Experience Your Team Will Love

Gliffy's key features, including Mermaid and AI diagramming, are visible from the moment you enter the canvas. This means your users are equipped to get the most out of the tool, with no training required.

Choosing draw.io could limit adoption and slow down productivity as your team faces more of a learning curve and searches for key features hidden inside sub-menus.

SOC 2 Compliance

Gliffy has achieved SOC 2 Type II compliance in addition to our Atlassian Cloud Fortified and Platinum Marketplace Partner status, demonstrating our commitment to go the extra mile to ensure your team can diagram with confidence. draw.io has not confirmed any SOC 2 certification, leaving security-focused enterprise teams with uncertainty.

Zero Egress at No Extra Cost

With Gliffy Diagrams for Confluence | Zero Egress & Isolated Cloud-Ready, all diagram data remains in your Atlassian environment by default.

A zero-egress switch is only available in draw.io's Advanced edition, requiring teams who don't need the full set of Advanced features to spend up to ensure compliance.

Get Gliffy and Diagram with Confidence

When you choose Gliffy, advanced diagramming you can trust is the default.

If you or a customer has questions about Gliffy or would like to see Gliffy in action with a live demo, please reach out to our team at sales@gliffy.com.
